NORMAN PUTSURE COLLEGE

CHUMOUKEDIMA : NAGALAND

Skill Class Reports

2026

Norman Putsure College
Chümoukedima, Nagaland
Participants: 6th Semester Students
Activity: Practical Field Visit to a Poultry Farm
Date of Documentation: May 11, 2026

As part of the college's commitment to experiential learning and skill enhancement, the 6th-semester students of Norman Putsure College participated in a practical skill class involving an educational field visit to a local poultry farm. In alignment with the institution's philosophy that education extends beyond textbooks to building real-world skills for self-sustenance and career readiness, the visit aimed to bridge theoretical classroom knowledge with hands-on agricultural and livestock management practices.

During the visit, students were exposed to the daily operations and management techniques of poultry farming. They observed young chicks in their early growth stages, learning about the critical care required during the brooding phase, including maintaining proper litter bedding and warmth. Examining the farm's setup, the students noted how starter feed is distributed in shallow feeding trays to ensure easy access for the chicks while minimizing feed wastage. Additionally, the participants gained valuable insight into farm hygiene and biosecurity, specifically how clean housing conditions and controlled litter moisture prevent common poultry diseases. The session also highlighted the economic potential of poultry farming as a viable small-scale enterprise and livelihood option in the region.

Through this field experience, students successfully moved beyond theoretical classroom concepts to witness firsthand the practical demands of livestock rearing. They acquired foundational, hands-on skills in chick care, feeding routines, and basic farm management. Furthermore, the interactive environment broadened their perspectives, encouraging them to consider agribusiness and local food production as sustainable and rewarding career avenues for the future.

The poultry farm visit proved to be an enriching and productive skill development session for the 6th-semester batch. By combining practical fieldwork with academic learning, Norman Putsure College successfully equipped students with actionable life skills and a broader perspective on self-reliance and entrepreneurship.

Report on Skill Class at Sovima, Chümoukedima, Nagaland

A Skill Class was organized by the college management for the BA 1st Semester students at Sovima, Chümoukedima, Nagaland, to impart practical knowledge on sustainable farming practices - organic bed preparation, plantation and encourage teamwork and experiential learning.

The skill class began with students being introduced into the farming site and soil preparation of the beds, followed by a demonstration by Mrs. Asenu Viswentso, Skill Instructor, on construction of raised planting beds using traditional tools – spades, dao and hand hoe. Students actively participated in loosening the soil, incorporating organic compost and levelling the beds for vegetable plantation. Subsequently vegetables saplings including tomato, cabbage – local and hybrid and lettuce were planted under proper guidance from Mrs. Aseno Viswentso, Skill Instructor and faculty in - charges – Mr. Keyolel Zhale, Ms. Dezevinuo Seyie, Mr. Ningmi Shally, Ms. Limayala Changkilari and Dr. Neikhrolo-u Wetsah, ensuring correct spacing, watering techniques and planting methods.

The skill class enhanced student's practical skill beyond classroom learning, promoting organic farming practices. The activity not only enriched student's understanding of farming and plantation but also enhanced responsible environmental practices and collaborative learning.
